

Spray Adjuvant

 - Proprietary Surfactant Mixture

PRODUCT #: 4150

CHARACTERISTICS:

Appearance: Green Liquid
 Odor: Characteristic
 pH: 6.80
 Specific Gravity: 1.024
 Weight: 8.54
 Viscosity: Water Like
 Flash Point: N/A
 Dilution: 1:40

ADVANTAGES:

Spray adjuvant is a professional-grade concentrate surfactant mixture. It is designed primarily as a soil penetrant to increase watering efficiency and generate deep root systems on lawns, turf and fairways. It is also excellent as a spreading agent to enhance coverage and wetting action of solutions of herbicides, fungicides and insecticides.

DIRECTIONS:

FOR WATERING LAWNS AND FAIRWAYS: Add or inject 1-4 pints per 1,000 sq. Feet in 10-15 gallons of water.

GREENS, THATCHED AND COMPACTED AREAS: Add or inject 1 quart per 1,000 sq. Feet in 10-15 gallons of water.

FOR INHIBITION OF DEW FORMATION: Apply 5 pints in 100 gallons of water to 25,000 sq. feet. Single application can be expected to inhibit dew formation for 2-4 days.

FOR AIDING THE SPREADING OF PESTICIDES: Fungicides and insecticides: Add 1-5 pints per 100 gallons of spray solution. Herbicides: Add 5-10 pints per 100 gallons of spray solution. Dilutions may vary with different methods of application. Use only enough to help penetration. Excessive rates will evidence themselves in excessive foaming and runoff.

PRECAUTIONS:

Inhalation: None Expected. Remove affected person to fresh air; if symptoms persist seek medical attention.

Skin: None Expected. Remove contaminated clothing; wash affected area with soap and water; launder contaminated clothing before reuse; if irritation persists, seek medical attention.

Eyes: Check for and remove contact lenses. Flush eyes with clear running water for 15 minutes while holding eyelids open; if irritation persists, seek medical attention.

Ingestion: Give two glasses of water for dilution; DO NOT induce vomiting; never give anything by mouth to an unconscious person; seek medical attention.
