DIRECTIONS:

FOR HAND WASHING: Dilute two or four ounces to each gallon of water in wash bucket. Brush the entire piece of equipment starting at the top and working down to the wheels. Rinse thoroughly and allow to dry.
FOR AUTOMATIC, COIN OPERATED OR HIGH PRESSURE CLEANING SYSTEMS: Use two to four ounces to one gallon of water. Automatic recycling systems should use only gallon to each five hundred (500) gallons of water in the holding tank. The dilution will give an abundance of suds and will ensure long brush life.
