Directions:

- For best results; Truck must be recently chipped, empty and dry.
- Discharge first to remove any debris and water that may be left in the drum.
- If the drum has any buildup remaining, DRUM SAVER will not affect the existing buildup but will still reduce any new buildup.
- Charge the drum slowly and pour 5 gallons of DRUM SAVER into the drum. This should take approximately 2-3 minutes.
- Discharge drum at a slightly higher RPM. This will allow DRUM SAVER to coat the entire drum and fins. This process should also take 2-3 minutes.
- Allow the drum to dry completely before the next load.

**KEEP OUT OF REACH OF CHILDREN.
DO NOT TAKE INTERNALLY.
AVOID CONTACT WITH EYES.**
