**Directions:**

- Remove loose soil, gum, etc. Dust mop, then damp mop to remove old dirt and soil. Allow floor to completely air dry before applying. For heavy traffic and worn areas use full strength. For normal maintenance dilute one to one with water.
- Apply with a sprayer in a line about three times the width of your buffering machine. Operate buffer back and forth over sprayed area until the floor is clean and shiny. Repeat on the rest of the floor if needed. Choice of cleaning and buffering pads depends on machine type and condition of floor. Rinse pads in warm or hot water after using and hang to dry. Dust mop to pick up loose residue from pad.
